## TUTO Rapido

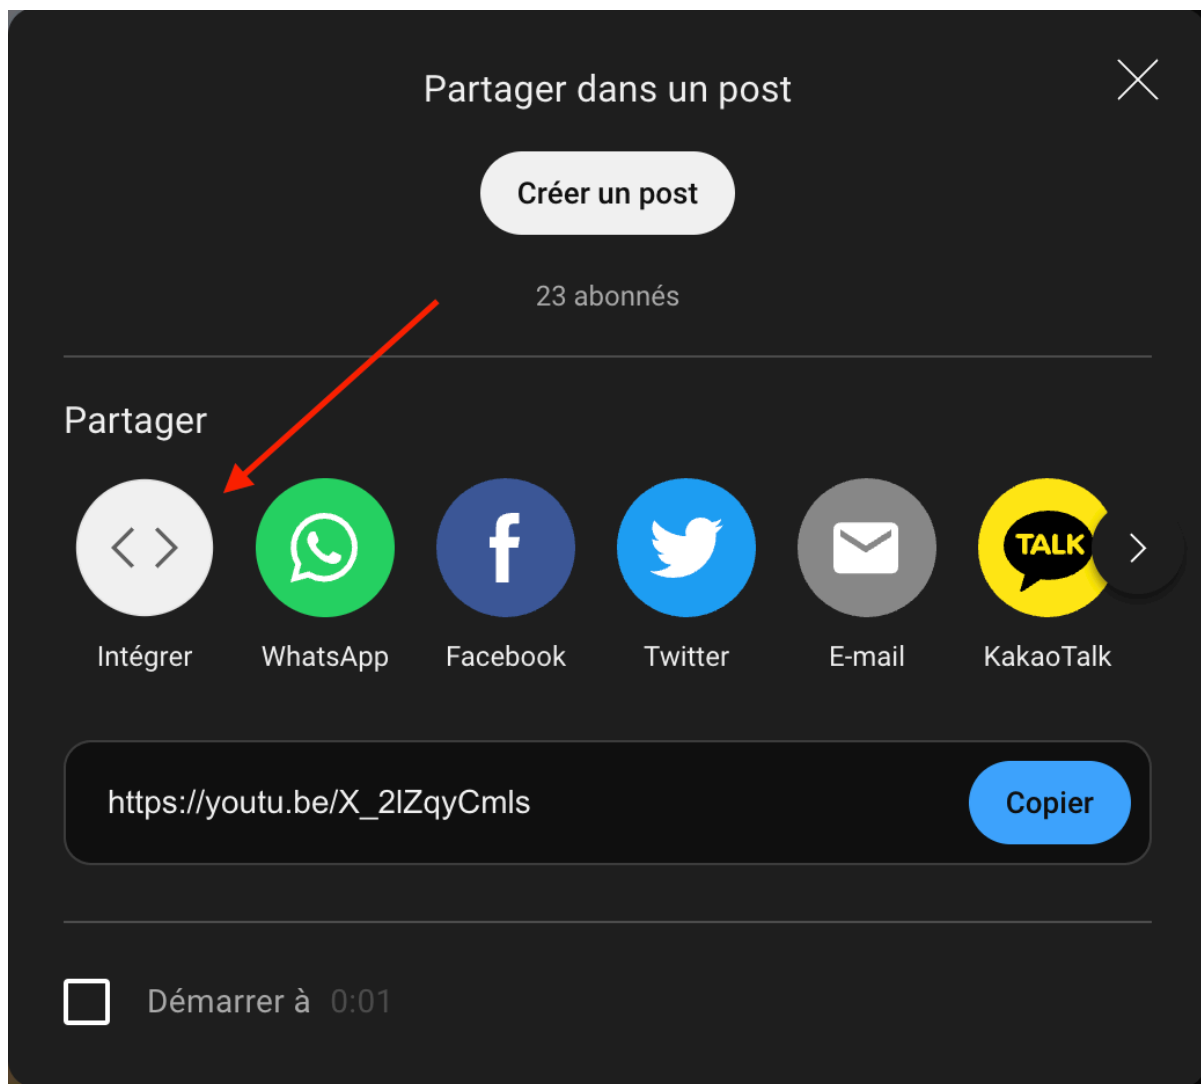

### Sujet

On arrive sur YT (ou Spotify, Soundcloud etc...)

On va sur partager

Ensuite dans partager on choisi « intégrer » ou « embed »

Enfin c'est Youtube (ou autre service), qui nous fournit le code HTML à passer dans notre page web

The screenshot shows a YouTube video player interface. The video title is "guy wraps rock in copper wire and throws it at power line #viral #risk #po...". The video player is currently paused, showing a red play button. To the right of the video player, the "Intégrer la vidéo" (Embed video) menu is open, displaying the HTML embed code. A red arrow points from the play button to the embed code. The embed code is as follows:

```
<iframe width="560" height="315"
src="https://www.youtube.com/embed/X_21z
qyCmls" title="YouTube video player"
frameborder="0" allow="accelerometer;
autoplay; clipboard-write; encrypted-
media; gyroscope; picture-in-picture;
web-share" allowfullscreen></iframe>
```

Below the code, there are options to "Démarrer à 0:01" (Start at 0:01) and "OPTIONS D'INTÉGRATION" (Embedding options). The "Afficher les commandes du lecteur" (Show player controls) option is checked, and the "Activer le mode de confidentialité avancé" (Enable advanced privacy mode) option is unchecked. A "Copier" (Copy) button is at the bottom right of the menu.

Meme système avec tous les services de streaming : ici Spotify

The screenshot shows the Spotify web interface. The main content area displays the album "Le disque Dor" by Gilles Dor, released in 2018 with 34 songs. The album cover features a close-up of a person's face. A context menu is open over the album, showing options: "Go to artist radio", "Add to Your Library", "Add to playlist", "Share", "Open in Desktop app", "Copy Album Link", and "Embed album". The "Share" option is selected, and the "Copy Album Link" option is highlighted. The left sidebar shows the "Your Library" section with various playlists and artists. The top navigation bar includes the Spotify logo, search, and user profile options.
